

With your support the Forest continues to grow. Look at what we achieved together.

Over the past 12 months the challenges we face creating and conserving a huge new woodland

for the country in a climate crisis have become ever more apparent, and this was compounded by the Covid-19 pandemic. Our dedicated team and army of volunteers achieved our tree planting target and we have now planted nearly 1.9 million trees since the charity began. As important as they are, the Forest is about more

than trees. It comprises a mosaic of habitats including heathland, grassland, wetland and farmland, that enable wildlife to thrive. The Forest is also here to benefit people. Our events programme attracted nearly 2,400 attendees, and the launch of the first accessible trail in the Forest has made woodland visits possible for more people.

I would like to personally thank everyone who has supported our work and helped to grow the Forest. I hope you are as excited as I am about what we can achieve together over the coming year. Jon Snow, Chair, Heart of England Forest

Our vision To create 30,000 acres of contiguous forest in the Heart of England to benefit the environment, wildlife and people for hundreds of years to come. The mosaic of habitats we are creating will help mitigate climate change, enable

wildlife to thrive, and provide a haven for people to visit which benefits their health, happiness and wellbeing. The year in numb

"I've benefitted from Young Foresters in several ways,

new skills in the outdoors,

including socialising, learning

and knowing that I've helped the Forest. As well as coming to the monthly club, I'm now volunteering in the Forest too.

Our first accessible wildlife trail launched in Morgrove Coppice,

enabling more people to benefit from time spent in the Forest.

"I had the pleasure of exploring Morgrove Coppice, one of my first trips out due to shielding for weeks because of my severe disability. A smooth, flat route that I felt very safe using. I wish more places could be as accessible and pleasurable for all. It made me feel like anybody else with my

wheelchair being no problem."

We were proud to be one of the first organisations in the country to employ a new forestry apprentice.

"I've done a lot of voluntary work in the past but being paid whilst

I train means I can really

progress my career now. I am looking forward to building on my skills over the next two years and am excited about the variety

of tasks I'll be undertaking

during my time here."

34,264 trees were planted by volunteers – an incredible

Phoebe

achievement.

of the season Connor was happy to work alongside some of the other volunteers, which gave him some independence. It's been fantastic seeing such positive

changes in Connor."

"Connor has learning difficulties and is not able to work, but tree

planting gave him a real sense

of purpose and his confidence has really grown. By the end
